TMI AT A HOSPITAL

*by Shannon Chanler
Acupuncturist*

I just wanted to share with you! The shadow box I made for our waiting room at Rochester General Hospital Cancer Center. The spoons bent last spring at the professional meeting have been on display for a year. The description is: "This is flatware bent with the intention of the mind by my friends / colleagues at the Monroe Institute in Faber VA. If you mind can influence metal, can you mind also help you heal?"

Thank you to my TMI friends that made this possible.
